Architectural Section - Housing - Completed Costs of Residences 1941 – 1947

Part 2

Introduction

The following scans are from a register produced by the Department of the Interior - Architectural Section listing completed building costs for Government housing constructed from 1941 to 1947.

These scans include information that would aid in researching house histories because the register includes the house type, the builder, suburb with block and section numbers and the commencement date of construction.

Prices/costs are listed in pounds, shillings and pence. Doubling these values will provide you with an approximate conversion to dollars and cents.

Imperial measurements are used. Use the following equations to convert to metric:

1 ft = 30.48 cm or 0.3048 m

1 yd = 91.44 cm or 0.9144 m

1 ft² = 0.0929 m²

1 yd² = 0.8361 m²

The original document is 70 cm by 70 cm and 39 pages long. Unfortunately due to the nature of the text in this document we were unable to apply text recognition (OCR) to the PDF files.
